Adjustable Standoffs for Structural Glass Railings

- Allow easy and precise vertical alignment of glass panels.
- No need for shims or extra washers.
- No need to remove glass panel in order to add extra washers.
- No need to bend glass panels in order to line them up using glass caps or handrails.
- After glass panel is set in place, it can be vertically aligned from the face side using Allan key.
- Individual standoffs can extend up to 1/4", which translates into a few inches of adjustability at the top of the glass.
- Material is 304 grade stainless steel. Satin finish.
- Standoffs come in 1 1/2" standard diameter (D) and standard lengths (L) of 1 1/2" and 2".
- Use 1/2"-13 fasteners for mounting.
- Recommended glass size is 1/2".
- Recommended hole size for glass is 3/4" to a max of 7/8".
- Engineering available.
- Patent pending.
